# What we do

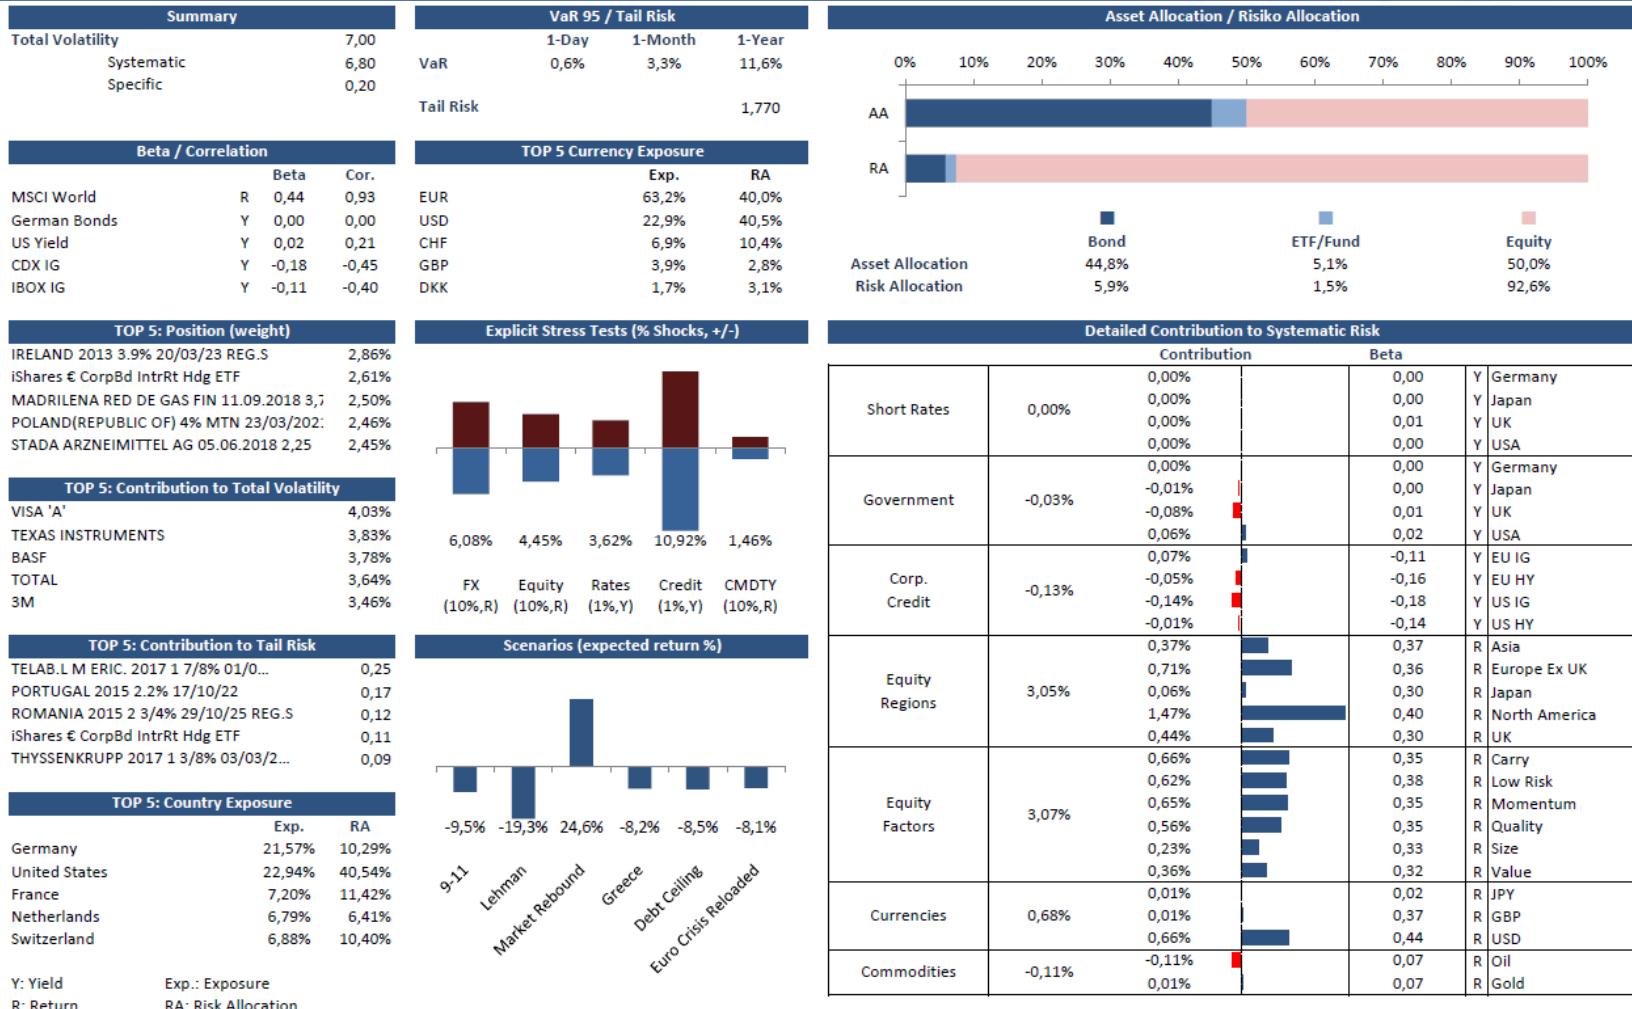

Risk Solutions - one of our core activities

# Risk Analytics

A 360° risk view provides the basis for well-informed decision making

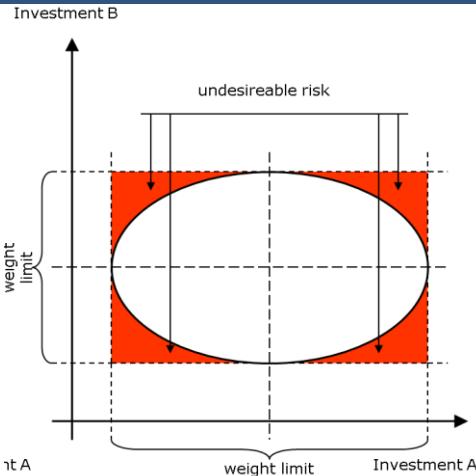

## Asset- and risk allocation, risk contribution and scenarios in a nutshell

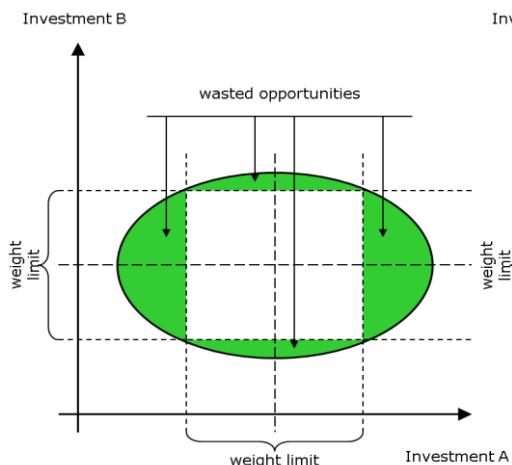

# Overlay Management

OM offers a larger opportunity set than plain vanilla downside protection

## Manage undesirable risks

## Improve returns

## The case for Overlay Management

- helps to balance opportunities with risk budgets
- provides opportunities to diversify or concentrate positions
- solves for the problem of „unintended bets“
- can deliver „portable betas“
  - i.e. transfer factor exposures across factors or back to market
- exploits otherwise „wasted opportunities“

# Risk Reporting & Overlay Management

Risk analysis for each segment and the portfolio as a whole

Advantage No.1. : more transparency within segments and overall portfolio

Top-Level Analysis		Position-Based Analysis		Factor-Based Analysis		Composition		Style
